Lesson 3: Tell me about a sport that you can play well.

Keywords:

Objective , manifest, offense, athletic, communication

Sample response

Playing basketball is one of my favorite activities that I can say, I play well, too. When I was introduced to sports in high school, I played other sports but I really got into basketball.

There are three reasons why I like to play basketball. First, it is a very physical sport which involves a lot of running and moving. On the game, there are five players from each team, and another five on the bench. A player should know how to control the ball or his opponents could steal the ball. The objective of the game is to shoot the ball through the basket. In the end, the most important skill of the game is defense; no

team can win a game without a powerful defense. Also, the physical activities in basketball could help a good player become a better player. Blocking, shooting, and powerful jumping are skills required and should be manifested during a game. On the other hand, the offense in a basketball game includes dunks, free throws, and jump shots (which are my favorite basketball moves).

Secondly, basketball is also good for the health. It helps me lose weight and it also gives me athletic speed and strengths. I used to be overweight but now I am in a better shape through the physical exercises I have to do during the training.

Lastly, I was able to improve my communication and social development skills through basketball. Players should regularly interact with each other in order to win a game.
